The Face of

UYUVTY

My journey into international business began with a vision—to connect businesses around the world with quality products sourced from India.

With a professional background in hospitality and management, I built my career around service, communication, attention to detail, and trusted relationships. I have now transitioned those skills into international trade, with UYUVTY focused on the human hair industry.

Through this journey, I have developed an understanding of human hair sourcing, manufacturing, quality, product specifications, and the expectations of international buyers. Today, UYUVTY focuses on sourcing and supplying 100% temple human hair from India while developing strong relationships with trusted manufacturers and buyers worldwide.

I believe lasting business partnerships are built through transparency, reliability, consistency, and mutual growth. My vision is to establish UYUVTY as a trusted global name while representing the quality and craftsmanship of India's human hair industry.

For me, UYUVTY represents more than a business—it represents transformation, ambition, connection, and a vision that reaches beyond borders.

— Tamana Kaul
Founder, UYUVTY

UYUVTY

PREMIUM HUMAN HAIR

AUTHENTIC INDIAN TEMPLE HAIR
GLOBAL WHOLESALE & EXPORT

100% HUMAN HAIR

AUTHENTIC • NATURAL • VERSATILE • GLOBAL

UYUVTY offers premium Indian temple hair in virgin and remy selections, carefully sourced from India for the international professional hair market. Our hair originates from voluntary tonsuring at temples across India, where devotees offer their hair as part of long-standing religious traditions. The collected hair then enters a specialized supply chain where it is carefully sorted, cleaned, aligned, and prepared by established human hair manufacturers. This distinctive origin makes Indian temple hair an important source for businesses seeking authentic human hair with traceable sourcing practices.

With a focus on quality, consistency, and reliable supply, UYUVTY connects international buyers with India's established human hair industry.

KEY HIGHLIGHTS
